DYNAMIC PRICING

Just about every golf course in the country will use some sort of “Dynamic Pricing”, which simply put, is a strategy in which product prices continuously adjust, sometimes in a matter of minutes, in response to real-time supply and demand.

At Eagle Ridge Resort we made Dynamic Pricing easy. We analyzed the times the courses were at their busiest/slowest periods during weekdays and weekends, and designed our green fees based on those times. During Prime Time you will pay a little more than during Non Prime times — when the courses tend to be not as busy.
