

Our Inspiration

Everyone deserves to dream. Dreams begin by believing in yourself, and are often fueled with support from others. Yet every day, many individuals are fighting to keep their dreams alive. Trauma, disease, and isolation can turn their dreams into darkness. This is especially true for children battling cancer, and veterans plagued by mental and emotional challenges. Both can carry invisible scars of anxiety, depression, and isolation. For them, dreams seem to evaporate, and life becomes smaller. We say, it's time for them to **DREAM BIG** again.

Mission Statement

The mission of Field of Big Dreams is to raise funds in support of organizations offering programs that improve the emotional and mental health of children with cancer, veterans, and their families. We exist to fuel them with the resources, support and hope they need to overcome obstacles and pursue their dreams.

About Field of Big Dreams

Field of Big Dreams is a charity established to support innovative, therapeutic and transformational programs serving pediatric cancer patients and survivors, veterans, and their families. Our goals are to fund programs which give them greater social connections, improve self esteem and independence, and increase access to training, employment support, and mental health care services. Our vision is to fuel their dreams, inspire hope, shine a light on what is possible, and provide a pillar of support to help turn their dreams into reality.
